## PROJECTS

### Smiling School — Holberton Project

In Smiling School, I created a nice looking website for a fake 'school' for smiling. This simple page is made with just HTML, CSS & Vanilla JavaScript

<https://zacwoll.github.io/holberton-smiling-school-javascript/>

### Airbnb Clone — Holberton Project

I collaborated with 2 other students to create this 4-part web application re-implementing Airbnb's basic functionality. This Website allowed a user to create Places to rent and utilizes an end-to-end system that can either use file storage or MySQL [https://github.com/zacwoll/AirBnB\\_clone\\_v4](https://github.com/zacwoll/AirBnB_clone_v4)

### QuoteMe — Personal Project

I created this Quotes app to get some experience running PostgreSQL in a Docker container. It uses an Express backend with Prisma's Type-safe ORM, coupled with a Front End built using React. You can create a user, login, make changes to quotes, favorite them, and share them on social media.

## PAST EXPERIENCE

### Starbucks, Livermore, CA — Shift Supervisor

2018 - Jan 2020

As a shift supervisor, I ensured business flowed smoothly and without incident. Anticipating customer needs and working to implement new products and layouts.

### Starbucks, Livermore, CA — Barista

Jan 2016 - 2018

Serving more than 300 customers a day, I am very friendly, adaptable, and efficient. I maintained a clean workspace and mapped out a complicated drink queue with a wide variety of drinks and foods on a daily basis.

## EDUCATION

### Holberton School, San Francisco, CA — Web Stack Program

Jan 2020 - Present

At Holberton School, I worked on projects with 3 databases, 4 languages, on remote Ubuntu servers and at both a high and low level. I've developed a breadth of knowledge that taught me how to survive tough problems.

## Technologies

Languages: JavaScript, TypeScript, Python, C

Front-End: React, HTML, CSS, Bootstrap, SCSS, JQuery

Back-End: Node, Express, Django

Database: PostgreSQL, MongoDB, MySQL

OS: Windows, Ubuntu 14.04/18.04/20.04

Other Technologies: Prisma (ORM), Docker, Bash | Powershell Scripting.
